Last year, 1,010 educators who work with over 30,000 kids participated in hands-on workshops with Life Lab. We asked them, “How did your Life Lab Workshop impact your teaching? How did it impact your students?”

Here is what they said...

“One of the best organized days of hands-on activities and philosophical underpinnings I’ve ever seen.”
5th Grade Teacher

“Every little idea and lesson and activity that is shared by somebody from Life Lab, all of our teachers just eat them up and love them!”
Co-Founder and Director of DC Greens’ Growing Garden Teachers Program

“Now my students are showing an improved respect toward the plants and animals on campus, an enthusiasm and curiosity to visit and learn from the garden, and expanded healthy eating practices.”
Kindergarten Teacher

79% saw a marked improvement in their students’ healthy eating choices.

88% saw a marked improvement in their motivation to bring kids outside.

85% saw a marked improvement in their students’ enthusiasm for learning, confidence, cooperation, creativity, and other skills that extend beyond academics.

95% saw a marked improvement in their motivation to engage students in hands-on, experiential learning.
